The diagram illustrates a linked list structure with four nodes. Each node is represented as a two-part box: the left part contains a number (201-1, 201-2, 201-3, 201-4) and the right part contains another number (202-1, 202-2, 202-3, 202-4). The nodes are arranged in a vertical sequence, connected by arrows pointing upwards. The top node (201-4, 202-4) has an arrow pointing to a box labeled 200. The second node (201-3, 202-3) is positioned to the left of the main sequence. The third node (201-2, 202-2) has an arrow pointing to the fourth node (201-1, 202-1). The bottom node (201-1, 202-1) has an arrow pointing to the third node (201-2, 202-2).
